

zound

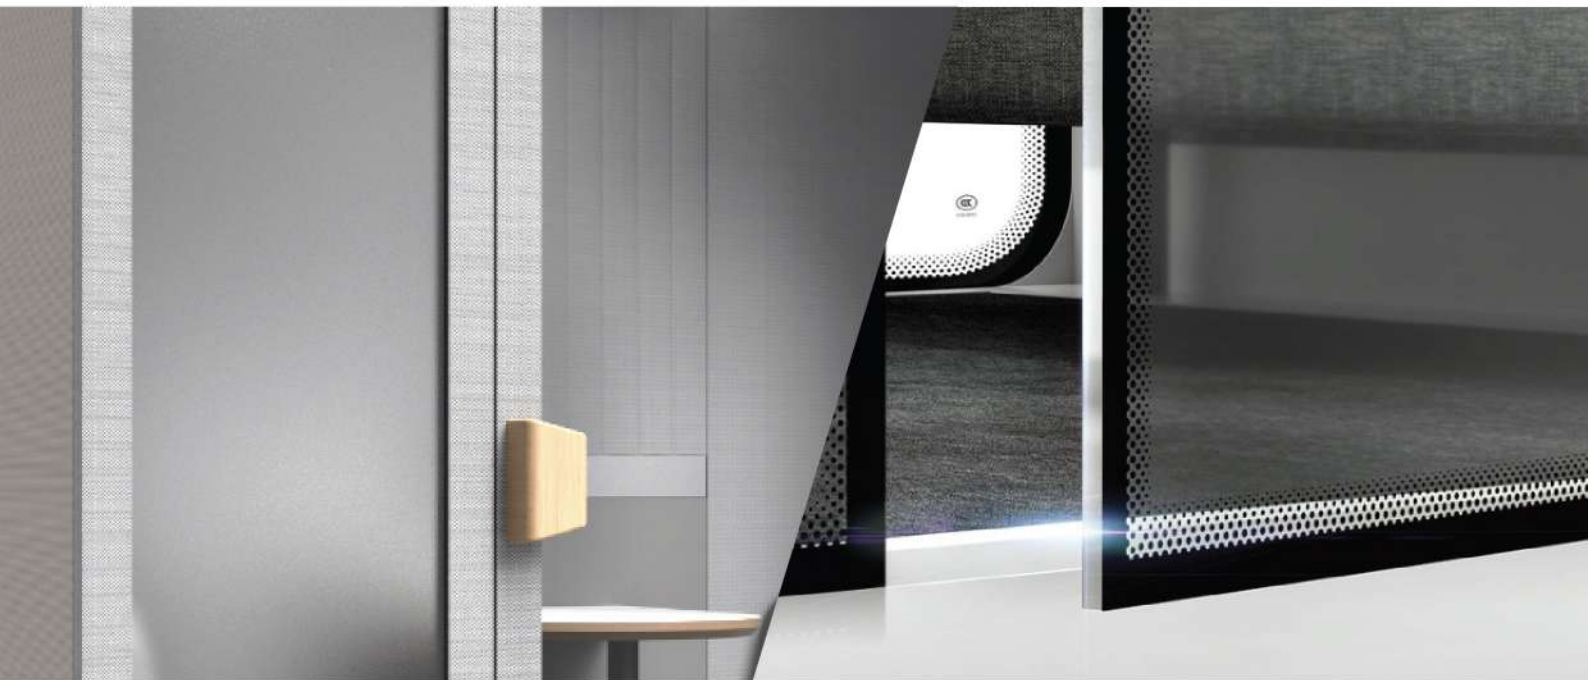

**YOUR SPACE
YOUR INNOVATION**

WHY ZOUNDPOD?

Ventilation System

Turbo Fan, with high rotation speed at 900 rpm. Provides continuous air circulation inside the cabinet to get high quality of pure air. This ensures that the air is fresh and sufficient.

Soundproof Glass

The special tempered glass is 10 mm thick and can block sound up to 30–35 dB. Design by acousitc engineering, his helps to keep out unwanted noise from outside.

Lighting and Power System

LED lights are installed according to the size of the cabinet. Each size is equipped with power sockets and USB ports.

Automatic Sensor Inside

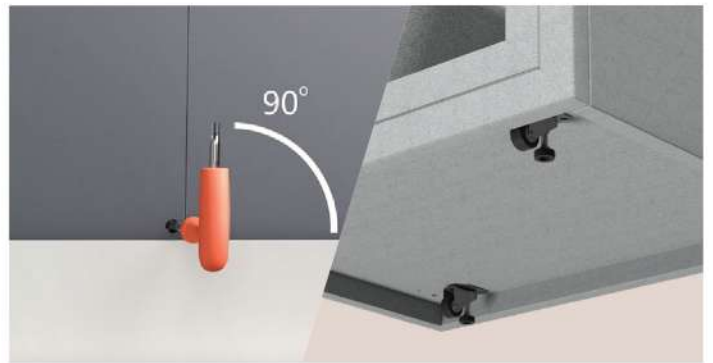

The sensor will detect movement. The system will automatically turn off if it is not in use within 5 minutes.

Complete Furniture

There is a table and chair that supports the body for work. Or you can choose the furniture style you like.

Easy to Move and Install

It can be installed within a few hours. Some models have wheels that can be moved and adjusted to the desired height.

ABOUT US

From the beginning, **ZOUND** is all about making offices feel great. We believe workplaces should be inspiring, warm, and bring out creativity.

Our goal is to help companies and their employees thrive together. We design every ZOUND Pod with your well-being and work experience in mind. It's not just furniture; it's about making your workspace a better place for you.

Welcome to ZOUND, where we keep it simple and make work a better experience for everyone.

Features

Sound Insulation

Recycled soundproofing materials block office noise for better focus.

Built-in Desk

Each Silence pod has a spacious, efficiency-focused desk to enhance productivity.

Motion Sensor

Benefit from motion-activated fans and LED lights for better energy efficiency.

Wheeled Base

Easily move your Silence pod for workspace flexibility.

Ventilation Fans

Stay cool and comfortable with ultra-quiet ventilation fans.

Power Outlets

Charge all devices with standard power outlets and USB ports.

Ethernet Port

Get a stable, high-speed connection with an optional Ethernet port.

Adjustable Lighting

Customize lighting levels for optimal comfort and focus.

- Eco-conscious design minimizes environmental impact.
- Durable, eco-friendly materials for long-lasting performance.

- Simple installation saves time and effort.
- Available in various colors to complement different aesthetics.

Art Pod Series

Designed for silence.
Built for a better future.

MODERN FURNITURE

Where Modern Workplace Meets Modern Furniture.

OUR PURPOSE

Making work a little more enjoyable.

It's simple: when you feel good while working, you're able to do your best work.

We aim to bring joy to your day through a more empathetic, ergonomic, and sustainable approach to how we treat our body and mind while working.

OUR PRODUCT

Designed for everyday, built for years to come.

We design and sell furniture made to be used all day, everyday. We ensure the products we put out in the world actually stay out in the world; that means they are built to last, backed by industry-leading warranties, and adaptable to changing environments and needs.

OUR STORY

During our transition, the following are the problems we have faced:

- 1) Unwanted noise initiated from the open co-working space environment inevitably forced our staff to spend some or most of their working time in our meeting rooms, resulting in all our rooms being occupied most of the time.
- 2) All our meeting rooms are designed to look beautiful and sleek, but very often, they are not treated with proper acoustics or positioned with suitable lighting conditions, resulting in unengaging and unproductive conferencing.
- 3) High-quality furniture always comes with a common-looking design despite its high price tag, or we can get low-cost furniture but trade off with unacceptable quality.
- 4) None of the furniture sought from any furniture supplier is able to cater to the requirements of the most common video conferencing solutions such as Zoom Room or Microsoft Teams Room for both small to large meeting spaces, nor can it adapt to the changing needs of the hybrid working environment.

We want to make our employees feel that this is their second home.

That is why our CEO has pieced together a solution and come up with Zound.

"With 'Zound,' we make it easy for individuals and teams to build a beautiful workspace where you can feel and work your best."

- 1-TO-ALL CEO 'Vasavas Nonsopa'.

There wasn't a great option for individuals and teams who wanted to furnish an inspiring office without taking forever or breaking the bank.

That's why we founded Zound: to make it easy for people and teams to create inspiring offices. Our collection costs half as much as premium furniture of comparable quality, and we design our products with your well-being and workday in mind.

If you're a team, we provide end-to-end service: space design, delivery, white-glove installation.

OUR STORY

In 2019, our CEO '**Vasavas Nonsopa**' discovered a problem: buying office furniture is a tremendous hassle for the modern workplace. The post-COVID-19 era has reshaped the way we work, transitioning from 100% onsite to a hybrid model. The new 'co-working style' modern office Has emerged, and traditional/ conventional furniture no longer meets our needs in terms of 50:50 or 60:40 onsite-remote practice. Having dedicated desk for each staff is not feasible from both real estate management and finance point of view.

After furnishing dozens of offices for a commercial real estate, our CEO realized that the average office furniture company falls into three categories:

- 1) **High quality and good design but expensive and slow.**
- 2) **Affordable and fast but lacking in design, quality, and service.**
- 3) **Nothing really fits the needs of the post-COVID-19 era modern hybrid work.**

In the past, we have had experiences transitioning from dedicated desks to co-working spaces, facing several problems that none of the furniture companies or designers could solve. We not only want our office to look sleek and beautiful at minimal cost but also to be functional. We need our workspace to reflect our culture, boosting employees' experience and improve productivity for our staff.
